# CORRUGATED TEXTILE STORAGE BOXES
## *Assembly instructions*

BOX BASE

1. Unfold the box and lay flat on floor or on a table score side up. Scores are the straight-line indentations between the corners indicated as gray lines on the drawings.

2. In preparation for assembly, pre-fold all the gray lines to align in proper direction and create flexibility for the final folding. This is particularly important at the narrow double score between flaps C and D. When assembly is complete, this narrow fold should form a flat edge, not a pointed edge. This pre-folding step makes the final as-sembly easier.

3. Facing the long side of the box (flaps C and D) fold up both A flaps. Bend tabs B 90 degrees inward. Fold flaps C and D and bend over the B tabs to trap between the C and D flaps. Snap the tabs from flap D into the slots in flap C to lock into place. The box base is complete.

BOX COVER

1. Unfold the box and lay flat on floor or on a table score side up. Scores are the straight-line indentations between the corners indicated as gray lines on the drawings.

2. In preparation for assembly, pre-fold all the gray lines to align in proper direction and create flexibility for the final folding. This is particularly importat the narrow double score between flaps C and D. When assembly is complete, this narrow fold should form a flat edge, not a pointed edge. This pre-folding step makes the final as-sembly easier.

3. Facing the long side of the box (flaps C and D) fold up both A flaps. Bend tabs B 90 degrees inward. Fold flaps C and D and bend over the B tabs to trap between the C and D flaps. Snap the tabs from flap D into the slots in flap C to lock into place. The box cover is complete.
