STIL® CASING SOLUTION

// COMPANY

Being for the preservation of film works, audio tapes or digital data, STIL® Casing Solution has a solution for each medium.

The products of the company are the result of many years of research and experiments in the field with the help of archivists and preservation technicians. At the end, we have been able to put together a state of the art preservation system for all media.

STIL® Casing Solutions' clientele is in constant growth, now over 350 clients in 23 countries. The clientele consists of major film studios, universities, film labs and post-production services as well as private or public institutions, government agencies, national, international or multinational corporations.

A VERSATILE CASE

Enclosure
to archive
digitized sound

Resilient
100% inert polypropylene

Platforms
to protect the film spires

Better venting
stops builds-ups of
dust or humidity

LONG-LASTING SOLUTIONS

To answer the needs of the audio industry, two of our containers are perfect to receive audio reels; the 16mm/400ft receives perfectly the 7" reel and the 16mm/1200ft is perfect for the 10" with a hub and a core. The latter proposes you, as an added security, a CD enclosure in the lid.

// PROTECTS AND PRESERVES

Made of 100% inert polypropylene.

Designed to insure ventilation.

They cannot be water soaked.

The cans are stackable, interlocking and they don't open only by dropping them.

CD/DVD case in the lid as an option available for the 16mm/1200ft container and the 16mm/2000ft only.

STIL casing answering to the standards drawn by ANSI, AIN and SMPTE.

OPTIONAL PRODUCTS

***Option**

available colors,
useful to codify your
different departments

**Enclosure for an
optical disk**

for any type of
digital media

***Option**

personalize your case by
adding your logo

Core

***Option**

white labels insures a clear
and reliable identification

Hub

prevents the lateral
sliding of your film

OPTIONAL PRODUCTS

// HUB

Designed to prevent the lateral sliding during transportation.

Used to hold an audio reel of 10".

Made of polypropylene.

Black is the only available color.

Size for 1200 ft and 2000 ft containers.

// CORE

Resilient, does not deteriorate.

Made of polypropylene, resistant to acids and bases.

Size : 3 in.

Blue is the only color available.

// LABEL

Made of vinyl, resistant to acid.

Adherence resistance to temperatures between -190°C and 125°C.

Can be peeled off and replaced easily.

Compatible with regular laser printers.

Possibility of permanently identifying the label with your logo.

Personalized dimensions available.

Also available in a roll for thermal printers.

VENTED CONTAINER

TECHNOLOGY

The analog media preservation vented container was designed to answer the needs of the audio and film industry.

The cans are made of 100% prime polypropylene, inert to acids and bases.

The containers are interlocking, made possible by the venting chimneys.

Inside the container, the film pancake sits on platforms :

1. This gives you uniform ventilation over and under the film.
 2. The platforms protect the perforations along side the film to prevent indentations that could happen with ridges or web type bottoms.
-

In the lid, flanking the edge, are stoppers that prevent the lid to crush the film or simply touch the film when a can is at the bottom of the column.

Ventilation is made by a low pressure created inside the container which wants to equilibrate itself with the outside high pressure, this creates air movement.

The large openings of the chimneys help for better air circulation and stop by their design water and dust penetration.
